### **DETAILED ACTION**

1. Claims 26, 100-114, and 133-141 are pending. Claims 26, 100-105, 107, 108, and 111-114 have been amended and claims 133-141 are newly added claims in this communication filed 8/13/08 entered as Response After Non-Final Action.
2. The Claim objection for claim 26 from the prior Office Action of 10/29/07 has been overcome and is hereby withdrawn.
3. The 35 USC 112, second paragraph rejections for claims 26, 100-103, 113, and 114 from the Office Action of 10/29/07 have been overcome by Applicants' amendment to the claims and are hereby withdrawn.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 26, 100-114, 133 and 134, drawn to a plurality of purchase request records created from data received from potential buyers, a plurality of participating seller records comprising information about a plurality of participating sellers, a buyer-seller association module and a seller access module, and a processor in communication with the software, classified in class 705, subclass 26
- II. Claims 135-138, drawn to directing a system database with a plurality of dealers registered to use the system, database software, and a dealer access software module stored on a computer-readable medium configured to permit registered dealer to access the system database over

a computer network using a remote terminal, classified in class 707, subclass 100.

- III. Claims 139-141, drawn to a storage device containing contact information for a plurality of dealers, purchase request software stored in storage media to direct the storage of purchase requests and instructions, dealer access software including instructions to allow the dealer or dealers within a dealer group access to the purchase requests, and a processor in communication with the storage device and the software, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different scopes, furthermore they have different modes of operation thus yielding different effects and are not capable of use together for the reason set forth.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after

the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

### ***Conclusion***

Applicants' amendment necessitated the new ground(s) of rejection (a restriction) presented in this Office action.
